

For Immediate Release:

Wednesday, February 13, 2013

Mist Mobility Integrated Systems Technology Inc. (MMIST) of Ottawa, Canada is pleased to announce the receipt of a contract from the Danish Defence Acquisition and Logistics Organization (DALO) for the provision of SHERPA™ PROVIDER Precision Guided Aerial Delivery Systems, ancillary equipment and support.

The Sherpa family of Precision Aerial Delivery Systems (PADS) has been chosen by over 20 different services/customers worldwide. It uses a GPS guided parafoil and sophisticated software that allows the system to measure winds in flight and autonomously steer the system to achieve precision landings.

About MMIST:

MMIST is a privately held Canadian corporation focused on the development sale and support of precision aerial delivery systems. Through the use of MMIST products and services, clients can overcome barriers to the delivery of critically needed supplies.
